

Shipping Policy

Official Policy Document for Smart Home and Intelligent Appliance Orders

SmartHome Electronics Store

Policy Owner	Operations, Logistics, and Customer Experience
Applies To	All orders for smart speakers, smart displays, thermostats, cameras, locks, lighting, sensors, robot vacuums, air purifiers, smart TVs, streaming devices, home hubs, security systems, and related accessories
Effective Date	July 2, 2026
Version	1.0
Document Type	External and Internal Policy

This Shipping Policy explains how orders are processed, packed, dispatched, delivered, signed for, delayed, split, redirected, lost, or damaged. It is written to support consistent customer service decisions and reliable retrieval in a customer-support knowledge base. The policy is not a guarantee of delivery on a specific day unless an express service with a confirmed delivery commitment has been purchased and accepted by the carrier.

Confidentiality: Public-facing policy with internal operating guidance embedded for service consistency.

1. Purpose and Scope

Purpose

This Shipping Policy establishes the rules that govern how SmartHome Electronics Store ships physical products to customers. The policy is designed for a smart-home e-commerce environment where orders may include connected devices, lithium-battery products, security equipment, accessories, replacement parts, and large-screen electronics. The goal is to set clear expectations for customers, reduce inconsistent service decisions, protect products during transit, and provide an auditable reference for customer support, warehouse, logistics, finance, and fraud-prevention teams.

Scope

This policy applies to all eligible online orders placed through our website, mobile application, official marketplace storefronts, and approved business-to-business purchasing channels. It covers domestic shipments, selected international shipments, standard parcel deliveries, expedited deliveries, freight deliveries for oversized products, replacement shipments, warranty-related shipments, and reshipments caused by carrier or warehouse exceptions. Where a separate written agreement has been signed for enterprise, installer, bulk, or channel partner orders, that agreement may override this policy only for the specific terms stated in the signed agreement.

Products covered

Covered products include Smart Speaker, Smart Display, Smart Thermostat, Smart Doorbell, Smart Camera, Smart Lock, Smart Plug, Smart Lighting, Robot Vacuum, Air Purifier, Security System, Streaming Device, Smart TV, Home Hub, Smart Sensor, and related accessories such as mounts, power adapters, cables, batteries, filters, brackets, installation kits, replacement parts, and bundled promotional items.

Relationship to other policies

Shipping outcomes may affect return, refund, warranty, privacy, and terms-of-service decisions. For example, a shipment damaged in transit may be handled under this Shipping Policy for the delivery investigation, while the refund or replacement decision may also reference the Refund Policy or Warranty Policy. If policies conflict, the more specific policy for the issue normally controls unless prohibited by applicable law.

2. Order Processing and Cut-Off Times

Processing definition

Order processing is the period between successful order placement and carrier handoff. Processing includes payment authorization, fraud screening, inventory allocation, warehouse picking, serial-number capture when required, device configuration checks for certain products, packaging, label creation, and final dispatch. A shipping confirmation email indicates that a label has been created or that the shipment has entered the carrier handoff process; it does not always mean the carrier has completed the first physical scan.

Standard processing time

Most in-stock parcel orders are processed within one to two business days. Orders containing smart TVs, security systems, multi-device bundles, large air purifiers, robot vacuums, high-value smart locks, or products requiring serial-number registration may require additional handling time. During promotional events, holidays, severe weather, inventory audits, system outages, or suspected fraud reviews, processing may take longer than the standard estimate.

Cut-off times

Orders placed before the daily cut-off time are normally eligible to begin processing the same business day. Orders placed after the cut-off time, on weekends, or on public holidays are treated as received on the next business day. Expedited shipping affects the transit speed after carrier pickup; it does not eliminate warehouse processing time unless an express same-day handling option is explicitly offered and purchased.

Payment and fraud checks

Orders are not released for shipment until payment is authorized and order-risk checks are complete. We may delay or cancel shipment if billing information, shipping address, device quantity, account history, IP location, payment method, or other risk signals indicate possible unauthorized activity. Customer support may request additional confirmation before dispatching high-value orders, repeated replacement requests, or orders shipped to freight-forwarding or temporary addresses.

Pre-orders and backorders

Pre-order and backorder items ship when inventory becomes available. Estimated release dates are provided for planning but may change due to supplier availability, customs inspection, quality control, manufacturing delays, or transportation disruptions. If an order includes both available and delayed items, we may split the shipment at no additional charge, hold the order until all items are available, or allow the customer to choose a preferred option when operationally feasible.

3. Shipping Destinations and Service Availability

Domestic shipping

We ship to eligible residential and commercial addresses within the domestic service area shown at checkout. Delivery availability may vary by postal code, product category, carrier capacity, building access, and local restrictions. Certain oversized or regulated products may not be available for delivery to remote areas, islands, military bases, parcel lockers, post-office boxes, or locations requiring special access.

Address accuracy

Customers are responsible for entering a complete, accurate, and deliverable shipping address. The address should include recipient name, street number, unit or apartment number, building name when applicable, postal code, phone number, and delivery instructions that do not conflict with carrier safety rules. We may standardize addresses using carrier or postal databases, but we are not responsible for delivery failures caused by incomplete or incorrect information provided at checkout.

Restricted addresses

Some products cannot be shipped to P.O. boxes, parcel lockers, pickup counters, hotels, short-term rentals, freight forwarders, mail drops, or reshipment centers. Smart TVs, large air purifiers, robot vacuums, and security systems may require a physical street address. Orders sent to restricted addresses may be cancelled, delayed, converted to an alternate service, or held pending address verification.

Business and installer addresses

For professional installers, property managers, and business customers, we may ship to offices, job sites, warehouses, or installation locations. The recipient must ensure that the location can safely receive the shipment, that someone is available to sign when required, and that building policies permit carrier access. Delivery to an unattended job site is not recommended for high-value connected devices.

Availability shown at checkout

The shipping options displayed at checkout are based on product category, delivery destination, item dimensions, battery classification, carrier availability, inventory location, and order value. If a displayed option later becomes unavailable, we may contact the customer, select an equivalent service, or cancel the order and issue a refund according to the Refund Policy.

4. Shipping Methods and Estimated Delivery Windows

Standard shipping

Standard shipping is the default service for most smart-home products. Standard parcels usually travel by ground or economy air service depending on destination, carrier network, and warehouse location. Estimated delivery windows are shown in business days and begin after carrier pickup, not when the order is submitted.

Expedited shipping

Expedited shipping may be offered for eligible products and destinations. Expedited services are prioritized in transit but still require order processing, fraud clearance, inventory availability, and carrier pickup. Expedited shipping may not be available for products containing larger lithium batteries, oversized smart TVs, certain security kits, heavy air purifiers, or destinations outside the main carrier network.

Freight and scheduled delivery

Oversized or fragile products, especially Smart TV models above standard parcel limits or multi-unit commercial orders, may ship by freight or scheduled delivery. Freight delivery may require a delivery appointment, signature, safe unloading area, and adult recipient. Unless a white-glove installation service is purchased, freight delivery generally means delivery to the threshold, curbside, lobby, or building receiving area determined by the carrier.

Estimated windows

Delivery windows are estimates, not guarantees. A typical domestic parcel order may arrive within three to seven business days after dispatch, while remote areas may require additional time. Expedited shipments may arrive faster depending on service type. Freight shipments may require five to fifteen business days or longer because of appointment scheduling, route consolidation, and local terminal availability.

Service comparison

The following table summarizes common service levels. The exact options available to a customer are determined at checkout.

Service	Typical Use	Estimated Transit	Important Notes
Economy / Standard	Most accessories, sensors, plugs, streaming devices, speakers	3-7 business days after dispatch	No delivery-date guarantee; may use regional carrier
Expedited	Eligible small and medium devices	1-3 business days after dispatch	Not available for all postal codes or regulated items
Freight / Scheduled	Large Smart TV, large air purifier, bulk bundles	5-15 business days after dispatch	Appointment and signature may be required
Replacement Shipment	Approved warranty, return, or carrier claim cases	Varies by product and inventory	May require original item scan, claim approval, or serial verification

5. Shipping Fees, Taxes, Duties, and Promotions

Shipping fees

Shipping fees are calculated at checkout based on destination, product category, item weight, dimensions, order value, service level, and promotional eligibility. Fees may differ for standard parcel, expedited parcel, freight, remote-area delivery, and special handling services. Shipping fees are charged per order or per shipment depending on the offer and operational setup.

Free shipping promotions

Free shipping promotions apply only when the promotional conditions are met at the time of checkout. Conditions may include minimum order value, eligible products, eligible destinations, eligible account status, or selected service level. Free shipping generally applies to standard shipping only and does not automatically include

expedited shipping, freight upgrades, installation, inside delivery, remote surcharges, customs duties, or carrier appointment fees.

Taxes and duties

Domestic taxes are calculated according to applicable rules and may be charged on products, shipping fees, or both. International orders may be subject to customs duties, import taxes, brokerage fees, value-added tax, clearance charges, and other government-imposed costs. Unless the checkout page states that duties and taxes are prepaid, the recipient is responsible for these charges and for providing customs documentation when required.

Shipping-fee refunds

Shipping fees are not automatically refundable. If we made an error, shipped the wrong product, or confirmed carrier damage covered by our claim process, we may refund standard shipping charges or provide a replacement shipping label. If the customer selected expedited shipping and the shipment was delayed for reasons outside our control, such as weather or customs inspection, expedited fees may not be refundable unless required by law or carrier service terms.

6. Product-Specific Shipping Rules for Smart Appliances

Small connected devices

Smart speakers, streaming devices, smart plugs, smart sensors, smart lighting accessories, and small home hubs normally ship as standard parcels. These items may be combined in one package when safe and available from the same warehouse. Serial-number capture may be required for warranty and fraud-prevention purposes.

Security and access products

Smart doorbells, smart cameras, smart locks, and security systems may be subject to higher address-verification standards because they are high-value or security-sensitive products. Certain security bundles may require adult signature, delivery photo, or restricted release. Orders that show unusual quantity, repeated replacement claims, mismatched billing and shipping information, or shipment to high-risk addresses may be delayed for review.

Environmental appliances

Robot vacuums and air purifiers may require reinforced packaging because of motors, wheels, filters, sensors, and larger housings. Replacement filters and accessories may ship separately from the main unit. If an air purifier includes a sealed filter pack, the customer should inspect the outer carton before opening and report visible transit damage promptly.

Large-screen electronics

Smart TVs are fragile and may exceed parcel-carrier size limits. They may ship by freight, scheduled delivery, or specialized large-item service. Customers should inspect the carton before accepting delivery where practical. If a screen appears cracked, the carton is punctured, or the delivery is mishandled, the recipient should note the damage with the carrier, take photos, and contact support before discarding packaging.

Thermostats and installation-sensitive products

Smart thermostats, smart locks, doorbells, and wired cameras may require installation compatibility checks after delivery. Shipping a product does not guarantee compatibility with a customer's wiring, door structure, HVAC system, Wi-Fi coverage, transformer voltage, or local installation rules. Compatibility issues are handled under the Return Policy, Warranty Policy, or product-support procedures, not by treating the shipment itself as failed.

7. Packaging, Battery, and Hazardous-Material Handling

Packaging standards

Products are packed to reduce the risk of ordinary transit damage. Packaging may include molded inserts, tamper-evident seals, protective films, shock-absorbing materials, double-wall cartons, moisture protection, and category-specific labels. Customers should keep all packaging until the product has been inspected, powered on, and confirmed undamaged.

Lithium batteries

Some products may contain integrated or replaceable lithium batteries, such as smart doorbells, cameras, locks, sensors, robot vacuums, and accessories. Battery products may be subject to carrier rules, air-transport limits, labeling requirements, quantity restrictions, and destination exclusions. Shipping options for battery products may be limited even when similar non-battery products are eligible for faster service.

Hazardous-material restrictions

We do not ship products in a manner that violates carrier or government regulations. If a product is classified as regulated for transport, we may restrict service level, destination, quantity, packaging, or return method. Customers may not return battery products using unapproved packaging or labels. A return label issued for one product may not be used to ship another product or additional batteries.

Tamper-evident and serial controls

For selected products, warehouses may record serial numbers or device identifiers before dispatch. Tamper-evident seals help protect customers and prevent resale fraud. If a customer reports missing items, wrong items, or suspected tampering, support may request photos of packaging, labels, seals, serial numbers, and packing slips before approving a replacement or refund.

8. Delivery, Signature, Access, and Failed Delivery

Delivery location

The carrier may deliver to the mailbox, doorstep, front desk, parcel room, building lobby, loading dock, locker, or other location considered deliverable under the carrier's service rules. A delivery scan may show completed delivery even if the customer has not personally collected the parcel from a building staff member, reception desk, mailroom, or parcel locker.

Signature requirements

We may require a signature for high-value orders, freight shipments, security devices, replacement shipments, business orders, or addresses with elevated delivery risk. If a signature is required, the customer should ensure that an eligible recipient is available during the delivery window. The carrier may attempt delivery multiple times before holding, returning, or redirecting the package.

Building access

Customers are responsible for ensuring that carriers can access the delivery location. Locked gates, restricted elevators, missing access codes, concierge refusal, construction barriers, unsafe pets, or building policies may prevent delivery. Delivery failure caused by access restrictions may result in delay, return to sender, reshipment fees, or order cancellation.

Failed delivery

If the carrier cannot deliver because of an incomplete address, recipient unavailability, refused delivery, safety concern, customs refusal, unpaid duties, or access issue, the package may be held for pickup, reattempted, returned to sender, or disposed of according to carrier policy. Refunds or reshipments for failed delivery are reviewed case by case.

Refused shipments

If a customer refuses delivery without prior support authorization, the order may be treated as an unauthorized return. The customer may be responsible for outbound shipping, return shipping, restocking costs, carrier fees, or loss caused by refusal. Refusal is appropriate only when the package is visibly damaged, unsafe to accept, not addressed to the customer, or when support has instructed the customer to refuse delivery.

9. Tracking, Split Shipments, and Address Changes

Tracking numbers

Customers receive tracking information by email, account notification, SMS, or order-history page when available. Tracking may take up to twenty-four hours to show movement after label creation. Some regional carriers update tracking less frequently, and freight shipments may rely on appointment calls rather than frequent online scans.

Split shipments

Orders may ship in multiple packages from different warehouses, especially when they include a mix of small accessories, large devices, replacement filters, and pre-order items. Each package may have a separate tracking number and arrival date. A partial delivery does not necessarily mean that remaining items are missing.

Address changes before dispatch

Customers should contact support immediately if an address must be changed. We cannot guarantee address changes after an order is placed. Once a shipment has entered fulfillment or carrier possession, address changes may be impossible, may require carrier approval, or may result in delay and additional fees.

Carrier redirects and holds

Carrier redirect, hold-for-pickup, or delivery-instruction services may be available for certain shipments. These services are controlled by the carrier and may not be available for restricted, high-value, signature-required, freight, or regulated battery shipments. If a customer redirects a package after dispatch, any resulting delay, loss, storage fee, or misdelivery may be the customer's responsibility unless applicable law provides otherwise.

10. Delays, Carrier Exceptions, and Force Majeure

Common delay causes

Delays may occur because of weather, natural disasters, strikes, customs inspections, high seasonal volume, incorrect address, carrier routing error, failed delivery attempt, damaged label, warehouse backlog, system outage, inventory discrepancy, fraud review, public holidays, road closures, or safety restrictions. We monitor significant exceptions and work with carriers when intervention is possible.

No automatic cancellation

A delayed shipment is not automatically cancelled. If tracking shows movement or the carrier is investigating, support may wait until the expected investigation period has passed before issuing a replacement or refund. This prevents duplicate shipments, fraud, and inconsistent claim outcomes.

Force majeure

We are not responsible for shipping delays or failures caused by events beyond our reasonable control, including severe weather, pandemic restrictions, labor disruptions, government action, customs holds, war, civil unrest, cyber incidents affecting carriers, transportation network disruptions, or other force-majeure events. We will make reasonable efforts to communicate known material delays.

Customer communication

When delays are known before shipment, we may update estimated shipping dates, send order notifications, offer cancellation when required, or provide revised delivery expectations. When delays occur after carrier pickup, tracking updates from the carrier are the primary source of transit information, supplemented by support investigations where appropriate.

11. Lost, Stolen, or Damaged Shipments

Lost shipments

A shipment may be considered lost when the carrier confirms loss, tracking shows no movement beyond the carrier's investigation threshold, or the shipment is returned without deliverable contents. Customers must report suspected loss within the claim window shown in support instructions. We may require confirmation of address, identity, delivery location, and carrier communications before issuing a replacement or refund.

Delivered but not received

If tracking shows delivered but the customer cannot locate the package, the customer should check the delivery photo if available, mailbox, parcel locker, front desk, building reception, mailroom, neighbors, household members, and alternate entrances. Support may open a carrier trace. Replacement or refund decisions are based on carrier evidence, delivery location, customer history, product value, claim timing, and applicable consumer-protection rules.

Theft after delivery

Risk of loss may transfer to the customer when the carrier confirms delivery to the correct address, subject to applicable law and carrier terms. We may assist with documentation for police reports, building management, or carrier claims, but we are not always responsible for theft after confirmed delivery. High-value products should be shipped to secure addresses where someone can receive them.

Damaged shipments

Customers should report visible damage, concealed damage, missing components, or suspected mishandling as soon as possible after delivery. Photos of the outer carton, inner packaging, shipping label, packing slip, product damage, and serial number may be required. Customers should not discard packaging until support confirms that the claim is complete.

Replacement or refund outcome

If a shipping claim is approved, we may offer replacement, repair shipment, part shipment, refund, store credit, or return label depending on product type, inventory, claim evidence, and policy eligibility. For large products such as Smart TVs, support may arrange a pickup, freight claim, or inspection before final resolution.

12. International and Cross-Border Shipping

International availability

International shipping is available only for selected products and destinations. Product availability may be limited by electrical standards, plug type, radio-frequency certification, warranty coverage, language support, customs rules, data privacy requirements, security-device regulations, battery restrictions, and carrier serviceability.

Duties and customs

Customers are responsible for customs duties, taxes, import permits, brokerage charges, and compliance with local rules unless checkout states otherwise. Customs authorities may open packages, inspect products, request documents, assess charges, delay delivery, or reject import. We are not responsible for delays caused by customs inspection or recipient failure to pay required import charges.

Unsupported regions

Some smart-home devices are designed for specific regions and may not function correctly outside supported markets. Features may depend on local app availability, cloud services, voice assistants, wireless bands, voltage, installation standards, privacy settings, or regulatory approvals. Shipping to an international address does not guarantee that all smart functions will be available in that country.

Returns from international destinations

International return shipping may be restricted, costly, or unavailable for battery products, large items, or customs-controlled goods. Customers should review product compatibility and import rules before ordering. Refunds for international orders may exclude duties, taxes, brokerage fees, and return shipping unless required by law or caused by our confirmed error.

13. Returns Connected to Shipping Issues

Return authorization

A shipping issue does not eliminate the need for return authorization when a product must be sent back. Customers should follow the Return Policy and obtain the correct label, packaging instructions, and return merchandise authorization before shipping any item back. Unauthorized return shipments may be delayed, rejected, or ineligible for refund.

Wrong item or missing item

If the customer receives the wrong product, wrong color, wrong configuration, incomplete bundle, or missing accessory, support may request photos of the product, packing slip, shipping label, serial number, and package contents. We may ship the missing item, provide a replacement, or require return of the incorrect item before completing resolution.

Return shipping responsibility

We generally pay return shipping for our confirmed fulfillment error, approved warranty replacement, or verified transit damage claim. Customers generally pay return shipping for buyer's remorse, accidental wrong address, refused delivery without authorization, incompatible installation environment, or a product ordered in error, unless local law or a specific promotion provides otherwise.

14. Internal Support Guidelines and Escalation Rules

Support principle

Customer support teams should apply this policy consistently while considering product value, customer history, carrier evidence, claim timing, and applicable law. Support should avoid promising a refund, replacement, or delivery date until the required evidence and internal checks are complete.

Evidence collection

For lost, damaged, missing, tampered, or wrong-item claims, support should request evidence proportionate to the claim. Typical evidence includes order number, tracking number, delivery photo, customer statement, package photos, product photos, serial number, carrier communication, police report for repeated theft claims, and confirmation that the shipping address is correct.

Escalation triggers

Escalate cases involving high-value Smart TVs, repeated delivered-not-received claims, suspected fraud, bulk security-device orders, lithium-battery transport incidents, regulatory restrictions, threats of legal action, media complaints, injury or safety concerns, customs seizures, and carrier disputes exceeding standard support authority.

Resolution documentation

Every exception should be documented in the order record, including the reason for decision, evidence reviewed, carrier claim number, replacement tracking number, refund reference, and any customer communications. Documentation supports auditability, fraud prevention, and future RAG retrieval accuracy.

15. Policy Updates and Customer Communications

Update frequency

This policy is reviewed periodically by Operations, Logistics, Legal, Finance, and Customer Experience. Updates may occur when carriers change service terms, regulations change, new product categories are launched, fraud patterns shift, delivery regions expand, or customer-support data shows recurring confusion.

Customer notice

Material changes to customer-facing shipping rules may be posted on the website, checkout page, help center, account notifications, or order-confirmation communications. The version in effect at the time of purchase generally applies to that order unless a later change is legally required or more favorable to the customer.

Knowledge-base use

For Basic RAG use, this document should be indexed with clear section titles, product-category references, and policy metadata. Retrieval systems should prefer the most recent approved version and should distinguish policy rules from customer-support scripts and examples.

16. Definitions

Business day

A business day is Monday through Friday excluding public holidays, carrier holidays, and warehouse closure days. Processing and transit estimates stated in business days do not normally include weekends or holidays unless the selected carrier service expressly provides weekend delivery.

Dispatch

Dispatch means the order has been prepared for shipment and handed to the carrier or placed in the carrier pickup flow. Label creation alone may not equal carrier possession.

Freight delivery

Freight delivery is a large-item shipping service for products that exceed standard parcel size or weight limits. It may include appointment scheduling, threshold delivery, curbside delivery, or specialized handling depending on the service purchased.

Carrier exception

A carrier exception is a tracking event or service interruption indicating that normal delivery flow has changed. Examples include weather delay, address issue, customs hold, damaged package, failed attempt, held at terminal, returned to sender, or misrouted shipment.

Appendix A. Category Shipping Matrix

The following matrix is a general operating guide. Checkout availability, carrier restrictions, and warehouse rules may override these general expectations.

Category	Typical Service	Shipping Risk	Operational Notes
Smart Speaker	Standard parcel	Low to medium	May ship with accessories; serial tracking optional

Smart Display	Standard or expedited parcel	Medium	Screen protection required; signature for high-value models
Smart Thermostat	Standard or expedited parcel	Medium	Compatibility questions are not shipping failures
Smart Doorbell	Standard parcel; battery restrictions may apply	Medium to high	May require adult signature or address review
Smart Camera	Standard parcel; battery restrictions may apply	Medium to high	Security-sensitive; fraud review may delay dispatch
Smart Lock	Standard parcel	High	Signature may be required; serial verification recommended
Smart Plug	Standard parcel	Low	Eligible for combined shipment
Smart Lighting	Standard parcel	Low to medium	Fragile bulbs require protective inserts
Robot Vacuum	Standard parcel or oversized parcel	Medium to high	Battery and motor handling; reinforced carton
Air Purifier	Standard parcel or freight for large models	Medium	Filters may ship separately
Security System	Standard parcel; restricted release possible	High	Bulk orders and replacements require review
Streaming Device	Standard or expedited parcel	Low	Small-item delivery; parcel locker may be allowed
Smart TV	Freight or large-item scheduled delivery	High	Inspect carton; keep packaging; screen damage claim rules apply
Home Hub	Standard parcel	Medium	May combine with sensors or speakers
Smart Sensor	Standard parcel	Low	Battery rules may restrict air service

Appendix B. Customer Support Scripts

Tracking has not updated

Your order has been packed and a shipping label has been created. Carrier tracking can take up to twenty-four hours to show the first movement scan. If there is still no update after the normal activation window, we can review the shipment status and contact the carrier if needed.

Delivered but customer cannot find package

I understand that tracking shows delivered but you cannot locate the package. Please check the delivery photo, parcel locker, mailbox, reception desk, mailroom, neighbors, household members, and any alternate entrances. We can open a carrier trace and review the claim once we confirm the delivery address and supporting details.

Damaged package

Please keep the product and all packaging materials. Send photos of the outside carton, inner packaging, shipping label, product damage, and serial number if visible. This helps us file a carrier claim and determine whether a replacement, refund, or pickup is appropriate.

Address change request

I can check whether the order is still eligible for an address change. Once an order is in fulfillment or with the carrier, address changes may not be possible and may depend on carrier approval.

Freight delivery appointment

Large-item shipments may require the carrier to schedule a delivery appointment. Please make sure an eligible recipient is available, the delivery area is accessible, and the carton is inspected before acceptance where practical.
